Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Nishi (RE39,318) discloses an image processing method (Nishi: column 1, lines 12-15). This apparatus comprises "encoding digital video content comprising a stream of pictures which can each be intra, predicted, or bi-predicted in the form of blocks of pixels forming a two dimensional array of two dimensional array frequency coefficients, the method comprising scanning the two dimensional array frequency coefficients from each of the blocks in a manner

that is vertically biased and producing a one dimensional array of frequency coefficients" (Nishi: figure 1; figure 31c; column 49, lines 55-58, wherein the vertically biased is the vertical priority). However, this apparatus lacks the particular scanning order as claimed. A further search was conducted which failed to yield any prior art. Therefore, the prior art fails to teach or render obvious these limitations taken within the others in the claim

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
